Digital Mapping Technician

Job Summary:

Martinez Geospatial, Inc. seeks qualified individuals for the position of Digital Mapping Technician. Individuals in this position will be responsible for digitally compiling planimetric and topographic maps through the use of stereo aerial imagery and various photogrammetric software. Depending on qualifications, new hires may also be utilized for 3-D modeling.

Required Skills:

- Candidate must be able to see digital stereo imagery in 3-D (to be determined through a practical test at first interview)
- Strong computer skills; comfortable working with technology
- Strong work ethic; ability to work independently
- Some evening/night work required

Preferred Skills:

- Autodesk Software (AutoCAD & Revit)
- Bentley MicroStation Software
- ESRI / GIS Software
- Leica Cyclone Software
- Background in Architecture, Civil Engineering, Structural Engineering, or Land Surveying
- College Degree or Advanced Education in Related Field
